Audit Findings Workpaper — To Be Completed

Enter one finding per row. Use concise, evidence-based language. Avoid describing a risk as a confirmed error unless the evidence supports that conclusion.

Finding ID	Area	Issue / Observation	Risk Rating	Assertion	Potential Misstatement	Direction	Proposed Audit Procedure	Evidence Required	Proposed Adjustment	Status
V-202	Payables	The supplier statement exceeds the ledger balance by $45.000. Its goods were received on 31 December, while the invoice was received after year-end and had not been recorded.	**High**	Completeness	Accounts payable may be understated by $45.000.	Understatement	Observe the year-end GRN, subsequent supplier invoice and payment, and reconcile the supplier statement to the ledger.	*Supplier statement *GRN *January Supplier invoice * Bank statement/subsequent payment *Purchase order	Provided that the required evidence will be verified the liability, the entry would be changed.	Evidence requested
V-204	Payables	The ledger balance significantly exceeds the supplier statement by $75.000 in debit balance. According to the received goods and invoiced dates, there may not be indicated a cut-off risk. However, it had been involved a debit balance. It could lead to an accuracy and classification risk.	**High**	Classification	Trade payables may be misclassified.	Reclassification	Inspect supplier invoices and payment records, reconcile the supplier account, and determine whether the $75.000 debit balance leads to an advance payment requiring reclassification.	*Supplier invoices *Supplier Reconciliation *Subsequent payment records *GL Detail *November Supplier Statement	If the required evidence validates the entry that was invoiced as a supplier advance, the $75.000 debit balance represents an advance payment and should reclassified from trade payables.	Evidence requested
V-205	Payables	The supplier statement exceeds massively the ledger balance by $190.000. Additionally, invoicing and goods received dates belong to different reporting periods. It may lead to a cut-off risk. Also recorded date was not specified, moreover three GRNs have not been invoiced.	**High**	Completeness	Trade payables may be understated.	Understatement	Analyze GRN documents, subsequent payment records, bank statements, supplier statements and GL detail.	*GRN documents *Subsequent payment records *Bank statements *Supplier statements *GL detail.	Record an additional liability of $190,000 if the unmatched GRNs and supporting invoices confirm that the amount relates to FY2026.	Evidence requested
V-207	Payables	The supplier statement exceeds the ledger balance by $48.000. Also, received goods and invoiced dates had been indicated differently. Thus, it may lead to a cut-off risk. Moreover, December consumption estimate is unknown.	**High**	Completeness	Trade payables may be understated.	Understatement	Check the January invoice and December consumption records to determine whether a year-end accrual is required.	*January Supplier Invoice *December Consumption Records *Supplier Statement *GRN / Service Records *Subsequent Payment / Bank Statement	Record an additional year-end accrual of $48,000 if the evidence confirms that the December consumption relates to FY2026.	Evidence requested
V-203	Payables	A $60.000 difference exists between the ledger and supplier statement, potentially related to a credit note under review.	**Medium**	Accuracy	Supplier balance may be misstated pending review of the credit note.	Reconciliation Required	Inspect the credit note and reconcile the supplier statement to the ledger to investigate the $60,000 difference	*Supplier Statement *Credit Note *Supplier Invoice *Supplier Reconciliation *General Ledger Detail	Adjust the supplier balance by $60.000 if the credit note and supporting evidence verify the difference.	Evidence requested
